Morning (Time: 2 hours)					Paper Reference 31760H						
Information Technology Unit 1: Information Technology Systems											
You do not need any other materials.								Total Marks			

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and learner registration number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 90.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

1/1/1/1/1/1

Answer ALL Questions. Write your answers in the spaces provided.

- 1** Joseph is a student in the final year of a three-year graphic arts course. At the beginning of his course he was given a second-hand laptop to use when completing college assignments.

The laptop is now five years old and Joseph is thinking of replacing it.

The operating system on the laptop is no longer supported by the manufacturer, which may cause security issues.

- (a) Explain **two** security issues that may arise from using an unsupported operating system.

- (b) Explain **two** issues, other than security, that may arise from using a five-year-old laptop.

(4)

- (c) Joseph has decided to replace the laptop with a new '2-in-1 laptop'. This will combine the functionality of a standard laptop and a tablet computer.

Joseph has decided to buy a computer with a pre-installed open source operating system, rather than one with a proprietary operating system.

- (i) Explain **two** benefits, **other** than the initial cost, of using an open source operating system.

(4)

- (ii) Explain **two** drawbacks of using an open source operating system.

(4)

- (d) The '2-in-1 laptop' has a Graphical User Interface (GUI) similar to a tablet computer.

Discuss the factors that make a GUI suitable for use in mobile devices such as tablet computers.

(6)

(Total for Question 1 = 22 marks)

2 Maria is a scientist working as part of a team studying the British weather.

An unmanned data logging system has been set up in the mountains of Scotland to monitor weather conditions such as temperature and rainfall.

(a) Explain what is meant by the term 'data logging'.

(2)

(b) Explain **two** benefits of using a data logging system to monitor weather conditions in a remote area.

(4)

- (c) Describe how a data logging system would be used to monitor weather conditions.

(6)

(d) Until recently Maria has collected the data by visiting the weather station.

Due to improvements in communication technology, Maria no longer needs to visit the weather station.

Explain **two** ways in which improvements in communication technology have removed the need to visit the weather station.

(4)

(e) When Maria receives the data from the weather station she needs to:

- analyse the data
- display the results in an appropriate format
- produce a report for the other scientists working in the team.

She has decided to use spreadsheet and word processing software to complete these tasks.

Discuss how the features of spreadsheet and word processing software would help Maria complete these tasks.

(6)

(Total for Question 2 = 22 marks)

- 3** Lakesuites Estate Agency sells properties in the Lake District. There is a head office with a small number of PCs linked to a network server. The network is backed up using a cloud storage system.

Agents visit prospective sellers to gather information about properties. Agents use an online form to enter property details into a tablet computer. These forms are then submitted to head office using a virtual private network (VPN).

Sales packs are created for each property, these packs are available online for prospective buyers to view.

Head office staff contact sellers and buyers via email.

Details of all properties and personal details of sellers and buyers are stored on the agency's server at head office.

- (a) Draw a diagram to show the integration of systems used by Lakesuites Estate Agency.

The diagram should include:

- devices and systems that could be used
- devices to be connected and the connection type(s) used
- the flow of data through the system
- annotations indicating the information and data to be passed between systems, devices and users.

Use this space to draw your diagram.

- (b) Agents gather information about properties from sellers and use tablet computers to enter property details into an online form.

Explain **three** factors that the agency should consider when setting up the online form.

(6)

(c) The online sales pack for each property includes:

- PDF documents giving details such as location, floor plans and energy ratings
- photographs
- a virtual tour video.

(i) Describe the use and implications of codecs when using video in digital format.

(4)

(ii) Discuss the factors that should be considered when making the sales packs available online.

- 4 Sebourne Community Centre has a main office and meeting rooms used by members of the community for a wide variety of activities.

There is a Local Area Network (LAN) serving all areas of the centre. There is a mix of both PCs and laptop computers and they are all connected to the LAN using Ethernet cables.

The computers vary in age and specification, many having been donated by members over the years.

The centre has been given a grant to replace the computer system.

It is considering replacing the system with wireless enabled laptops.

- (a) Analyse the implications of replacing the existing computers with wireless enabled laptops.
